

Regensburg University Hospital leads the field in research, teaching and patient care. We employ 4400 dedicated colleagues, who provide first-rate medical care for the whole of Eastern Bavaria. We offer cutting-edge medicine, and our top professionals have access to the latest and best equipment. We are committed to the highest level of medical and nursing care for our patients, and to a teamwork that respects and values our personnel.

The Department of Psychiatry and Psychotherapy at the University Regensburg is offering

PHD POSITION (M/F)

With focus on **data science** in the context of tinnitus research
Fulltime, start in September 2017, duration: 3 years

The position will be part of the European School on Interdisciplinary Tinnitus Research (ESIT, www.esit.tinnitusresearch.org) – a Marie Skłodowska-Curie Action funded by the European Commission.

Responsibilities

- Active participation in the training activities of the European School on Interdisciplinary Tinnitus Research (ESIT)
- Large-scale data analysis with the goal of identifying indicators for treatment success and risk factors at subject-level
- Harmonization of international data collection across research projects within the ESIT network

Requirements

- Good skills and experience in carrying out multi-level statistical analyses
- Basic experience with SQL databases
- Master degree or equivalent in data science, life or natural sciences
- Basic knowledge in psychology, medicine or biology
- Basic experience in clear writing of scientific reports or articles
- Very good skills in English in speech and writing
- Basic skills in German or willingness to learn the language, in order to communicate with patients
- Ability and willingness to work as a team player
- You should not have a doctorate degree yet

We offer

- A diverse and attractive environment for Interdisciplinary research training with close clinical connections
- High-quality education within the European School on Interdisciplinary Tinnitus Research (ESIT), funded by the Marie Skłodowska-Curie Actions
- Hands-on research training in an Interdisciplinary team of experienced researchers and clinicians
- Excellent opportunities for cooperation with an international team of tinnitus experts
- Excellent supervision on your research project at multiple levels

The post is remunerated on the TV-L salary scale. Preference will be given to disabled applicants with equal qualifications. Please indicate disablement in your application.

At the time of recruitment, the applicant must not have worked or studied more than 12 months during the previous 36 months in Germany.

Applications by 7 June 2017 to
